New Products

Kenra introduces two new products: Shine Spray and Shine Serum. Both are formulated to bring instant radiance, health and shine to all hair types. Kenra Shine Spray provides weightless finish and effortless shine to any hairstyle. The superfine aerosol mist, which contains sunflower seed extract, hydrolyzed silk and cosmetic-grade silicones, controls frizz and flyaway's while UV protectants help guard hair color from fade and oxidation. Humidity-resistant Shine Serum delivers long lasting shine and polish with excellent frizz and flyaway control.

Kenra introduces new Shine Serum, a lightweight, humidity-resistant serum that minimizes breakage and provides thermal protection from heat styling tools. It contains rich antioxidants from sunflower seed oil and extract. The shine serum prolongs hair health and longevity with a silky smooth finish. It can be used on wet or dry hair, before or after the use of heat-styling tools.
