Two New Products From Kenra Fight Summer Frizz

By [Lotus Abrams, Managing Editor](#) | JUN 9, 2009

Kenra just launched two innovative styling products to fight summer's bad hair days: Shine Spray and Shine Serum. Shine Spray, a superfine aerosol mist containing sunflower seed extract, cosmetic-grade silicones and hydrolyzed silk, controls frizz and flyaways while UV protectants help guard haircolor from fading and oxidation. Shine Serum also delivers long-lasting shine and polish with excellent frizz and flyaway control, in addition to providing thermal protection from heat-styling tools. For frizz control and extra shine, apply Shine Serum on damp or dry hair, before or after using heat-styling tools.
